- iii) The report shall contain measurement methodology, duration of measurement, measurement of individual harmonic from 5th to 50th, for arriving the multiplier so as to give relief in respect of the individual harmonics limited within 25% of the values specified against the individual harmonics. All these shall be as per the CEA Regulation read with IEEE STANDARD 519-2014.
- iv) The duration of measurement shall be strictly adhered to as per IEEE STANDARD , otherwise the current harmonic distortion value arrived by measurement may drift from the true value and lost the precision.
- v) The measurement shall be done with a class A meter which will fully (not partially) complaint as per the specifications of both standards viz, IEC6100-4-7(edition 2.0)., IEC 6100-4-30(Edition3.0).The existing meters may be connected in parallel and the recordings of both the meters shall be furnished. The difference between the measurement suggested by TANGEDCO and the CEA methodology to be studied in detail.

- vii) The measurement shall be done when industry is working with a load current nearer to maximum demand average current arrived as per the IEEE definition so as to get a real representative current harmonic distortion value
- viii) The measurement shall be done in the presence of the consumer or his authorised representative.
- ix) The report shall invariably mention the period of measurement, the meter details, like make, slno., compatibility with both the IEC STANDARDS, with its full specifications.
- x) The licensee shall be in a position to clarify any queries raised on measurement and its report.
