**Date of Order:** 25-04-2017

1. The M.P.No.6 of 2017 has been filed by the Petitioner with the following prayers, namely:-

- (i) to cover HT-IIB and LT-I B(2) under the net metering scheme;
- (ii) to provide net metering to measure input from the grid and the excess solar generation fed into the grid;

- (iii) to calculate the value of grid consumption at appropriate tariff and to calculate the excess generation fed into the grid at 50% of the latest solar tender rate or 50% of solar preferential tariff whichever is less;
- (iv) to restrict the solar roof top capacity to 50% of the contracted demand and in case solar capacity exceeds 50% of the contracted demand then to consider only 50% of the contracted demand for billing.
- (v) to relax 90% cap imposed during particular settlement period;
- (vi) to apply the revised scheme of the existing LT/HT networking scheme;
- (vii) to cover HT-IIA and HT-III consumers availing parallel operation without net metering under the new accounting methodology;
- (viii) to cover HT IIB and LT IIB(2) consumers under the new accounting methodology;
- (ix) to specify the control period and settlement period as one year (financial year)
- (x) to install net meters to all net metering consumers and to levy appropriate tax.

2. The above prayer seeks to adopt the above revised accounting methodology in the existing net metering scheme approved by Tamil Nadu Electricity Regulatory Commission in Order No.3 dated 13-11-2013 so as to promote more solar Roof top systems in the State to achieve the target fixed by Gol.

The amendment seeks to omit HT-II B consumers from the revised accounting methodology already proposed in the main petition. The amendment also seeks to

omit the prayer for relaxation of 90% cap imposed during the particular settlement period, which has been proposed in the main petition.
