

**Tamil Nadu Electricity Regulatory Commission**  
**Draft Intra-State Open Access Regulations, 2011**  
**Notification No. TNERC/ISOA/..... Dated 02-06-2011**  
***(Comments/suggestions are invited on or before 01-07-2011)***

WHEREAS under the Electricity Act, 2003 (Central Act 36 of 2003), the State Electricity Regulatory Commission shall specify the terms and conditions for intra state open access within the State of Tamil Nadu;

AND WHEREAS these Regulations providing for the terms and conditions of open access shall be subject to previous publication and accordingly undergone previous publication;

NOW THEREFORE, under Section 181 of the said Electricity Act 2003 and all other powers enabling in that behalf, the Tamil Nadu Electricity Regulatory Commission hereby makes the following Regulations, namely, -

**CHAPTER 1**

**PRELIMINARY**

**1. Short Title, Extent and Commencement. -**

(1) These Regulations may be called the Tamil Nadu Electricity Regulatory Commission (Grid connectivity and Intra-State Open Access) Regulations, 2011.

(2) These Regulations shall come into force on the date of publication in the Government Gazette.

**2. Scope. -**

These Regulations shall apply to open access for use of intra-State transmission system and or distribution systems in the State, including when such system is used in conjunction with inter-State transmission system. The provision of Open Access

is subject to the directions issued by the State Load Despatch Centre (SLDC) and the Restriction and Control (R&C) measures approved by the Commission.

### **3. Definitions. -**

(1) In these Regulations, unless the context otherwise requires, –

(a) "Act" means the Electricity Act, 2003 (36 of 2003);

(b) "Allotted Capacity" means the power transfer in MW between the specified point(s) of injection and point(s) of drawal allowed to a long-term/medium-term open access customer on the intra-State transmission system / distribution system and the expression "allotment of capacity" shall be construed accordingly;

(c) "Applicant" means a consumer, trader, distribution licensee or a Generating company who has applied seeking connectivity or open access, as the case may be;

(d) "Central Commission" means the Central Electricity Regulatory Commission referred to in sub-section (1) of Section 76 of the Act;

(e) "Commission" means the Tamil Nadu Electricity Regulatory Commission constituted under sub-section (1) of Section 82 of the Act;

(f) "Contracted load" means the load in kW/HP/kVA (kilo Watt/Horse Power/kilo Volt Ampere) which the distribution licensee has agreed to supply from time to time subject to the governing terms and conditions and is different from the connected load;

(g) "Day" means a day starting at 00.00 hours and ending at 24.00 hours;

(h) "Distribution licensee" means any person licensed under Part IV of the Act for distribution and retail supply of electricity in the State of Tamil Nadu;

(i) "IEGC" means Indian Electricity Grid Code specified by Central Electricity Regulatory Commission under clause (h) of sub-section (1) of section 79 of the Act, and as amended from time to time;

(j) "Imbalance" in a time block for a generating station means its total actual generation minus its total scheduled generation and for a consumer or buyer means its total drawal minus its total scheduled drawal;

(k) "Long-term open access" means the right to use the intra-State transmission system or distribution system for a period exceeding 12 years but not exceeding 25 years;

(l) "Medium-term open access" means the open access for a period exceeding three months but not exceeding three years;

(m) "Month" means a calendar month as per the Gregorian calendar;

(n) "Nodal agency" means the agency specified in column (4) of Tables 1 and 2 of these Regulations;

(o) "Open access" means the nondiscriminatory provision for the use of transmission lines or distribution system or associated facilities with such lines or system by any licensee or consumer or a person engaged in generation in accordance with these Regulations and includes long-term open access, medium-term open access and short-term open access;

(p) "Open access customer" means a consumer, trader, distribution licensee or a generator who has been granted open access under these Regulations;

(q) "Reserved Capacity" means the power transfer in MW between the specified point(s) of injection and point(s) of drawal allowed to a short-term / medium-term open access customer on the transmission/distribution system depending on availability of transmission/distribution capacity and the expression "reservation of capacity" shall be construed accordingly;

- (r) "Short-term open access" means open access for a period up to one month at a time;
- (s) "SLDC" means the State Load Dispatch Centre established under subsection (1) of section 31 of the Act;
- (t) "State Grid Code" means the State Grid Code specified by the Commission under clause (h) of sub-section (1) of section 86 of the Act, applicable on the date of commencement of these Regulations and as amended from time to time;
- (u) "State Transmission Utility (STU)" means the Company specified as such by the State Government under sub-section (1) of section 39;
- (v) "Transmission licensee" means any person licensed under Part IV of the Act for transmission of electricity;
- (w) "Transmission System Segment" means a part or whole of the transmission system from the point of injection to the point of drawal;
- (x) "Wheeling" means the operation whereby the distribution system and associated facilities of a transmission Licensee or distribution Licensee, as the case may be, are used by another person for the conveyance of electricity on payment of charges to be determined under section 62 of the Electricity Act, 2003;
- (2) Words and expressions used and not defined in these Regulations but defined in the Act or IEGC or the State Grid Code or any other Codes / Regulations issued by the Commission shall have the meaning assigned to them under the Act or the IEGC or the State Grid Code or any other Codes / Regulations issued by the Commission, as the case may be.

(3) The General Clauses Act, 1897(10 of 1897), as amended from time to time shall apply for the interpretation of these Regulations as it applies for interpretation of an Act of Parliament.

## **CHAPTER 2**

### **CONNECTIVITY**

#### **4. Connectivity. -**

(1) Only a consumer having load of 10 MW and above or a consumer availing supply at 66 kV and above or a Generating Station having capacity of 10 MW and above or a Generating Station requiring connectivity at 66 kV and above shall be eligible to obtain connectivity to the intra-State transmission system, unless already connected, and shall apply for connectivity, in accordance with the provisions in this chapter.

(2) Consumer having load of less than 10 MW or a consumer availing supply at 33 kV and below or a Generating Station having installed capacity less than 10 MW or a Generating Station requiring connectivity at 33 kV and below shall be eligible to obtain connectivity to the Distribution system and shall apply for connectivity as per the provisions of these Regulations, unless already connected, in accordance with the provisions in this chapter.

#### **5. Application procedure for Connectivity to intra-State transmission system. -**

(1) Applicant shall apply to the STU for connectivity in the Form prescribed in the detailed procedure to be laid down by the STU.

(2) The Application shall be accompanied by a non-refundable fee of Rs. Two Lakhs in the manner as mentioned in the procedure to be issued by the STU. The application fee is inclusive of the charges for any load flow / system studies to be conducted by the STU.

(3) The application for connectivity shall contain details such as, proposed geographical location of the applicant, quantum of power to be interchanged that is the quantum of power to be injected in the case of a generating station including a captive generating plant and quantum of power to be drawn in the case of consumer, with the intra-State transmission system and such other details as may be laid down by the State Transmission Utility in the detailed procedure:

Provided that in cases where once an application has been filed and thereafter there has been any material change in the location of the applicant or change, by more than 10 percent in the quantum of power to be interchanged with the intra-State transmission system, the applicant shall make a fresh application, which shall be considered in accordance with these Regulations.

## **6. Processing of Application and Grant of connectivity to STU. -**

(1) On receipt of the application, the STU shall, in consultation and through coordination with other agencies involved in the intra-State transmission including the Distribution Licensee, process the application and carry out the necessary interconnection study as specified in the Central Electricity Authority - Technical Standards for Connectivity to the Grid, Grid Standards and Technical Standards for construction of electrical plants and electric lines Regulations.

(2) While granting connectivity, the STU shall specify the name of the sub-station or pooling station or switchyard where connectivity is to be granted. In case connectivity is to be granted by looping-in and looping-out of an existing or proposed line, the STU shall specify the point of connection and name of the line at which connectivity is to be granted. The STU shall indicate the broad design features of the dedicated transmission line and the timeframe for completion of the dedicated transmission line.

(3) The applicant and all intra-State transmission licensees including the State Transmission Utility shall comply with the provisions of Central Electricity Authority - Technical Standards for Connectivity to the Grid, Grid Standards and Technical Standards

for construction of electrical plants and electric lines Regulations as amended from time to time.

(4) The applicant shall sign a connection agreement with the State Transmission Utility or intra-State transmission licensee owning the sub-station or pooling station or switchyard or the transmission line as identified by the STU where connectivity is being granted:

Provided that in case connectivity of a generating station, including captive generating plant or customer is granted to the intra-State transmission system of an intra-State transmission licensee other than the State Transmission Utility, a tripartite agreement as provided in the Central Electricity Authority (Technical Standards for Connectivity to the Grid) Regulations shall be signed between the applicant, the State Transmission Utility and such intra-State transmission licensee.

(5) The grant of connectivity shall not entitle an applicant to interchange any power with the grid unless the applicant obtains long-term open access, medium-term open access or short-term open access as the case may be in accordance with the provisions of these Regulations.

(6) A generating station, including captive generating plant which has been granted connectivity to the grid shall be allowed to undertake testing including full load testing by injecting its infirm power into the grid before being put into commercial operation, even before availing any type of open access, after obtaining permission of the State Load Despatch Centre, which shall keep grid security in view while granting such permission. Commercial treatment including the tariff for such infirm power from a generating station or a unit thereof will be governed by the concerned Regulations / Orders in force issued by the Commission from time to time.

(7) An applicant may be required by the State Transmission Utility to construct a dedicated line to the point of connection to enable connectivity to the grid, unless exempted by the Commission for reasons to be recorded in writing. In cases where

augmentation of the STU / Transmission Licensee's sub-station is involved, the generating station shall also bear the cost of bay, breaker in the STU / Transmission Licensee's sub-station and equipment for inter-connection of real time data to SLDC

(8)The STU shall convey its decision on grant of connectivity or otherwise within a period of 60 days from the date of receipt of application in complete shape.

#### **7. Application procedure for Connectivity to distribution system for a generating station. -**

(1) All eligible generating stations including a captive generating plant, seeking connectivity to the distribution system, shall apply to the distribution licensee for connectivity in the Form prescribed in the procedure to be laid down by the Distribution Licensee.

(2) The Application shall be accompanied by a non-refundable fee of Rs. Two lakh in the manner as mentioned in the procedure to be issued by the Distribution Licensee. The application fee is inclusive of the charges for any load flow / system studies to be conducted by the Distribution Licensee.

(3) The application for connectivity shall contain details such as, proposed geographical location of the generating station, quantum of power to be injected and such other details as may be laid down by the distribution licensee concerned in the procedure.

#### **8. Processing of Application and Grant of connectivity to distribution system for a generating station. -**

(1) On receipt of the application, the distribution licensee shall, in consultation and through coordination with State Transmission Utility, process the application and carry out the necessary inter-connection study as specified in the Central Electricity Authority -

Technical Standards for Connectivity to the Grid, Grid Standards and Technical Standards for construction of electrical plants and electric lines Regulations.

(2) While granting connectivity, the distribution licensee shall specify the name of the sub-station or pooling station or switchyard where connectivity is to be granted.

(3) The distribution licensee shall indicate the broad design features such as switchyard and interconnection facility up to the point of injection into the Substation of the distribution licensee and the timeframe for completion of the same. The cost of creation of these facilities shall be borne by the Generating Company. In cases where augmentation of the distribution licensee's sub-station is involved, the generating station shall also bear the cost of bay, breaker in the distribution licensee's sub-station and equipment for inter-connection of real time data to SLDC.

(4) The applicant and the distribution licensee shall comply with the provisions of Central Electricity Authority - Technical Standards for Connectivity to the Grid, Grid Standards and Technical Standards for construction of electrical plants and electric lines Regulations.

(5) The applicant shall sign a connection agreement with the distribution licensee where connectivity is being granted.

(6) The grant of connectivity shall not entitle an applicant to interchange any power with the grid unless it obtains long-term open access, medium-term open access or short-term open access as the case may be in accordance with the provisions of these Regulations.

(7) A generating station, including captive generating plant which has been granted connectivity to the distribution system shall be allowed to undertake testing including full load testing by injecting its infirm power into the grid before being put into commercial operation, even before availing any type of open access, after obtaining permission of the State Load Despatch Centre and the distribution licensee, who shall keep grid security in

view while granting such permission. Commercial treatment including the tariff for such infirm power from a generating station or a unit thereof will be governed by the concerned Regulations / Orders in force issued by the Commission.

(8) An applicant may be required by the Distribution Licensee to construct a dedicated line to the point of connection to enable connectivity to the distribution system, unless exempted by the Commission for reasons to be recorded in writing.

(9) The Distribution Licensee shall convey its decision on grant of connectivity or otherwise within a period of 60 days from the date of receipt of application in complete shape.

### **CHAPTER 3**

#### **GENERAL PROVISIONS FOR OPEN ACCESS**

##### **9. Eligibility for Open Access and conditions to be satisfied. -**

(1) Subject to the provisions of these Regulations, the licensees, generating companies, captive generating plants and consumers shall be eligible for open access to the intra-State transmission system of the State Transmission Utility or any transmission licensee on payment of transmission and other charges as may be determined by the Commission in accordance with Chapter 5 of these Regulations.

(2) Subject to the provisions of these Regulations, the licensees, generating stations, captive generating plants and consumers shall be eligible for open access to distribution system of a distribution licensee on payment of the wheeling and other charges as may be determined by the Commission in accordance with Chapter 5 of these Regulations.

(3) Subject to the provisions of these Regulations, open access shall be permissible to the consumers seeking open access capacity up to which the Commission has introduced open access and are connected through an independent feeder emanating from a substation of licensee:

Provided that the consumers who are not on independent feeders, shall be allowed open access subject to the restrictions in the feeders serving them in line with the Commission's Regulations / Codes / Orders:

Provided further that duties of the distribution licensee with respect to such open access consumers shall be of a common carrier providing non-discriminatory open access as per section 42(3) of the Act.

(4) A person having been declared insolvent or bankrupt or having outstanding dues against him for more than two months billing of distribution/transmission licensee at the time of application shall not be eligible for open access.

(5) In the case of a person, to whom open access has already been allowed, is declared insolvent or bankrupt or is having outstanding dues for more than two months billing of transmission or distribution Licensee, he shall not be eligible for open access from the day he is adjudged as insolvent or bankrupt or failed to clear the amount outstanding for more than two months billing.

(6) The open Access shall be allowed to the intra state transmission system subject to the satisfaction of the conditions contained in the Act and in these Regulations. Having regard to operational constraints and other relevant factors, open access shall be allowed to all EHT & HT consumers irrespective of load.

(7) A person covered by a policy relating to captive generation or generation through non conventional energy sources shall be eligible to avail open access for their own use irrespective of contract demand.

**10. Criteria for granting long-term open access or medium-term open access or short term open access. -**

(1) Before awarding long-term open access, the State Transmission Utility shall have due regard to the augmentation required for the intra-State transmission system.

(2) Medium-term open access or short-term open access shall be granted if the resultant power flow can be accommodated in the existing transmission system or the transmission system under execution:

Provided that no augmentation shall be carried out to the transmission system for the sole purpose of granting medium-term open access or short-term open access:

Provided further that construction of a dedicated transmission line shall not be construed as augmentation of the transmission system for the purpose of this Regulation.

**CHAPTER 4**

**APPLICATION PROCEDURE AND APPROVAL**

**Application Procedure and Approval for Open Access to Consumer**

**11. Categories of Open Access Consumers. -**

The application procedure, application fee and the time frame of processing request by eligible consumers seeking Open Access shall be based on the following criteria: -

(1) System to which connected

(a) Intra-State transmission system

(b) Distribution system

(2) Inter-se location of drawal and injection points

- (a) Both within the same distribution system
- (b) within the State but in different distribution systems
- (c) In different States

(3) Duration of Open Access

- (a) Long term access
- (b) Medium-term open access
- (c) Short-term open access

**Explanation:**

(i) Open access applications for a period more than 3 years and up to 12 years shall be considered under medium term open access only and shall be allowed at a time for a period exceeding 3 months, but not exceeding 3 years.

(ii) Similarly, Open access applications for a period more than 1 month and up to 3 months shall be considered under short term open access only and shall be allowed at a time for a period up to 1 month.

**12. Application procedure for Open Access. -**

(1) All applications for open access shall be made in the prescribed Form and submitted to the Nodal agency in accordance with these Regulations. The application fee is inclusive of the charges for any load flow / system studies to be conducted by the STU.

(2) All applicants seeking open access shall submit an undertaking of not having entered into Power purchase agreement (PPA) or any other bilateral agreement for the capacity (quantum of power) for which open access is sought.

(3) Subject to the provisions of these Regulations, the Nodal agency, Application fee, Documents to accompany the application and time frame for disposal of application is specified in the Tables 1 and 2.

### **13. Procedure for Long Term Access. –**

**(1) Involving inter-State transmission system:** Notwithstanding anything contained in clauses (2) and (3) herein below, procedure for inter-State long-term open access shall be as per Central Electricity Regulatory Commission's Regulations or Orders issued for this purpose and amended from time to time.

Provided that in respect of a consumer connected to a distribution system / transmission system seeking inter-State long-term open access, the SLDC, before giving its consent to the RLDC as required under the Central Commission's Regulations or Orders, shall require the consumer to submit the consent of the distribution licensee / transmission licensee concerned.

**(2) Involving only intra-State transmission system:** Subject to the provisions of clause (1) herein above, intra-State long-term open access involving intra- State transmission system shall be in accordance with the provisions of sub-clause (a) to (l) herein below.

(a) The application for grant of long-term open access shall contain details such as name of the entity or entities from whom electricity is proposed to be procured along with the quantum of power and such other details as may be laid down by the State Transmission Utility in the detailed procedure:

Provided that in case augmentation of transmission system is required, the applicant shall also have to bear the transmission charges for the same as per these Regulations:

Provided further that in cases where there is any material change in location of the applicant or change by more than 10 percent in the quantum of power to be

interchanged using the intra-State transmission system, a fresh application shall be made, which shall be considered afresh in accordance with these Regulations.

(b) The applicant shall submit any other information sought by the nodal agency including the basis for assessment of power to be interchanged using the intra-State transmission system and power to be transmitted to or from various entities or regions to enable the nodal agency to plan the intra-State transmission system in a holistic manner.

(c) The application shall be accompanied by a bank guarantee of Rs.10,000/- (Ten thousand) per MW of the total power to be transmitted. The bank guarantee shall be in favour of the nodal agency, in the manner laid down under the detailed procedure.

(d) The bank guarantee of Rs. 10,000 /- (Ten thousand) per MW shall be valid and subsisting till the execution of the long-term open access agreement, in the case when augmentation of transmission system is required, and till operationalization of long-term open access when augmentation of transmission system is not required.

(e) The bank guarantee may be encashed by the nodal agency, if the application is withdrawn by the applicant or the long-term open access rights are relinquished prior to the operationalisation of such rights when augmentation of transmission system is not required.

(f) The aforesaid bank guarantee will stand discharged with the submission of bank guarantee required to be given by the applicant to the State Transmission Utility during construction phase when augmentation of transmission system is required, in accordance with the provisions in the detailed procedure.

(g) On receipt of the application, the nodal agency shall, in consultation and through coordination with other agencies involved in intra-State transmission system to be used, process the application and carry out the necessary system studies as expeditiously as possible so as to ensure that the decision to grant long-term open access is arrived at within the timeframe specified in Tables 1 and 2:

Provided that in case the nodal agency faces any difficulty in the process of consultation or coordination, it may approach the Commission for appropriate directions.

(h) Based on the system studies, the nodal agency shall specify the intra-State transmission system that would be required to give long-term open access. In case augmentation to the existing intra-State transmission system is required, the same will be intimated to the applicant.

(i) While granting long-term open access, the nodal agency shall communicate to the applicant, the date from which long-term open access shall be granted and an estimate of the transmission charges likely to be payable based on the prevailing costs, prices and methodology of sharing of transmission charges specified by the Commission.

(j) The applicant shall sign an agreement with the State Transmission Utility in case long-term open access is granted by the State Transmission Utility, in accordance with the provision as may be made in the detailed procedure. While seeking long-term open access to an intra-State transmission licensee, other than the State Transmission Utility, the applicant shall sign a tripartite long-term open access agreement with the State Transmission Utility and the intra-State transmission licensee. The long-term access agreement shall contain the date of commencement of long-term open access, the point of injection of power into the grid and point of drawal from the grid and the details of dedicated transmission lines, if any, required. In case augmentation of transmission system is required, the long-term open access agreement shall contain the time line for construction of the facilities of the applicant and the transmission licensee, the bank guarantee required to be given by the applicant and other details in accordance with the detailed procedure.

(k) Immediately after grant of long-term open access, the nodal agency shall inform the State Load Despatch Centre so that it can consider the same while processing requests for grant of short-term open access, received under these Regulations.

(l) On the expiry of the period of long-term open access, the same shall stand extended on a written request by the consumer, to the State Transmission Utility, submitted at least six months prior to such expiry, mentioning the period for which extension is required:

Provided that in case no written request is received from the consumer within the timeline specified above, the said long-term open access shall stand terminated on the date up to which it was initially granted.

(3) **Within same distribution system:** The procedure specified in clause (2) above shall, mutatis mutandis, apply to cases of long-term open access when the point of injection and the point of drawal are located in the same distribution system.

#### **14. Procedure for medium-term open access. -**

(1) **Involving inter-State transmission system:** Notwithstanding anything contained in clauses (2) and (3) herein below, procedure for inter-State medium-term open access shall be as per Central Electricity Regulatory Commission's Regulations or Orders issued for this purpose and amended from time to time.

Provided that in respect of a consumer connected to a transmission system / distribution system seeking inter-State medium-term open access, the SLDC, before giving its consent to the RLDC as required under the Central Commission's Regulations, shall require the consumer to submit the consent of the transmission licensee / distribution licensee concerned.

(2) **Involving only intra-State transmission system:** Subject to the provisions of clause (1) herein above, intra-State medium-term open access involving intra-State transmission system shall be in accordance with the provisions of clause (a) to (f) herein below.

(a) The application for grant of medium-term open access shall contain such details as may be laid down under the detailed procedure and shall, in particular, include the point of injection into the grid, point of drawal from the grid and the quantum of power for which medium-term open access has been applied for.

(b) The application shall be accompanied by a bank guarantee of Rs.2000/- (two thousand) per MW of the total power to be transmitted. The bank guarantee shall be in favour of the nodal agency, in the manner laid down under the detailed procedure.

(c) The bank guarantee of Rs. 2000 /- (two thousand) per MW shall be kept valid and subsisting till operationalization of medium-term open access.

(d) The bank guarantee may be encashed by the nodal agency, if the application is withdrawn by the applicant or the medium-term open access rights are relinquished prior to the operationalisation of such rights.

(e) The start date of the medium-term open access shall not be earlier than 5 months and not later than 1 year from the last day of the month in which application has been made.

(f) On receipt of the application, the nodal agency shall, in consultation and through coordination with other agencies involved in intra-State transmission, process the application and carry out the necessary system studies as expeditiously as possible so as to ensure that the decision to grant or refuse medium-term open access is made within the timeframe specified in Tables 1 and 2:

Provided that in case the nodal agency faces any difficulty in the process of consultation or coordination, it may approach the Commission for appropriate directions.

(g) On being satisfied that the requirements specified in Regulation 9 are complied with, the nodal agency shall grant medium-term open access for the period stated in the application:

Provided that for reasons to be recorded in writing, the nodal agency may grant medium-term open access for a period less than that sought for by the applicant:

Provided further that the applicant shall sign an agreement for medium term open access with the State Transmission Utility, in accordance with the provision as may be made in the detailed procedure. While seeking medium-term open access to an intra-State transmission licensee, other than the State Transmission Utility, the applicant shall sign a tripartite medium-term open access agreement with the State Transmission Utility and the intra-State transmission licensee. The medium-term open access agreement shall contain the date of commencement and end of medium-term open access, the point of injection of power into the grid and point of drawal from the grid, the details of dedicated transmission lines required, if any, the bank guarantee required to be given by the applicant and other details in accordance with the detailed procedure.

(h) Immediately after grant of medium-term open access, the nodal agency shall inform the State Load Despatch Centre so that it can consider the same while processing requests for short- term open access received under these Regulations.

(i) On expiry of the period of the medium-term open access, the medium- term consumer shall not be entitled to any overriding preference for renewal of the term.

**(3) Within same distribution system:** The procedure specified in clause (2) above shall, mutatis mutandis, apply to cases of medium-term open access when the point of injection and the point of drawal are located in the same distribution system.

## **15. Procedure for short-term Open Access. -**

(1) **Involving inter-State transmission system.** - Notwithstanding anything contained in clauses (2) to (3) herein below, procedure for inter-State short-term Open Access shall be as per Central Electricity Regulatory Commission's Regulations or Orders issued for this purpose and amended from time to time.

Provided that in respect of a consumer connected to a transmission system / distribution system seeking inter-State short-term open access, the SLDC, before giving its consent to the RLDC as required under the Central Commission's Regulations, shall require the consumer to submit the consent of the transmission licensee / distribution licensee concerned.

(2) **Involving only intra-State transmission system.** - Subject to the provisions of clause (1) herein above, intra-State short-term Open Access shall be in accordance with the provisions of sub clause (a) to (f) herein below:

### **(a) Open Access in advance. -**

(i) Application may be submitted to the Nodal Agency seeking short-term open access up to the fourth month, considering the month in which an application is made being the first month.

(ii) Separate application shall be made for each month and for each transaction in a month.

(iii) The application to the Nodal agency shall be on the prescribed form given in **[FORMAT ST-1]** containing such details as capacity needed, generation planned or power purchase contracted, point of injection, point of drawal, duration of availing open access, peak load, average load and such other additional information as may be required by the Nodal agency. The application shall be accompanied by a

non-refundable application fee in cash or by demand draft in favour of the officer so notified by Nodal agency.

(iv) An application for grant of open access commencing in any month may be submitted in a cover marked "Application for Short-Term Open Access – in advance" up to 15<sup>th</sup> day of the preceding month.

For example, application for grant of open access commencing in the month of July shall be received up to 15<sup>th</sup> day of June.

(v) Nodal agency shall acknowledge receipt of the application by indicating time and date on "ACKNOWLEDGEMENT" to the applicant.

(vi) A consumer of distribution licensee intending to avail open access shall also furnish a copy of his application to the distribution licensee of his area of supply.

(vii) Based on the type of transactions, Nodal agency shall take a decision on the applications for short-term open access in the manner provided herein below.

(viii) All applications received under sub-clause (iv) above shall be taken up for consideration together and processed as per allotment priority criteria specified under Regulation 19 of these Regulations.

(ix) Nodal agency shall check transaction for congestion of any element (line and transformer) of transmission and distribution system involved in transaction.

(x) Nodal agency shall convey grant of open access or otherwise in format [FORMAT-ST2] along with schedule of payments to the consumer latest by 19<sup>th</sup> day of such preceding month.

(xi) Nodal agency shall assign specific reasons if open access is denied under sub-clause (x).

**(b) Day-Ahead Open Access. -**

(i) An application for grant of day ahead open access may be received by Nodal agency within three days prior to the date of scheduling but not later than 1300 Hours of the day immediately preceding the day of scheduling for day-ahead transaction.

For example, application for day-ahead transaction on 25th day of July shall be received on 22nd day or 23rd day or up to 1300 hours on 24th day of that month.

(ii) Nodal agency shall check for congestion and convey grant of approval or otherwise in the same format [FORMAT-ST2] as provided in sub-clause (x) of clause (a) above. All other provisions of application for short-term open access shall apply.

**(c) Bidding Procedure. -**

(i) If the capacity sought by the consumers for Open Access in Advance for the following month is more than the available capacity or SLDC perceives congestion of any element of transmission and distribution system involved in the transaction, the allocation shall be made through electronic bidding procedure.

(ii) The decision of SLDC in respect of an expected congestion shall be final and binding.

(iii) SLDC shall convey information of congestion and decision for invitation of bidding indicating floor price on format [FORMAT- ST3] to the applicants.

(iv) SLDC shall also display bidding information on its website.

(v) The floor price of transmission and wheeling charges determined on the basis of relevant Order of the Commission shall be indicated in FORMAT-ST3.

(vi) The Bids shall be accepted on format [FORMAT-ST4] up to the “bid closing time” as indicated in bidding invitation FORMAT- ST3. Modification / amendment to a bid, once submitted shall not be entertained.

(vii) If any consumer does not participate in bidding process, his application shall be deemed to have been withdrawn and shall not be processed.

(viii) SLDC shall not entertain any request for extension of time/date for submission of bids.

(ix) The bidders shall quote price (rounded-off to whole number) in denomination in which floor price has been determined.

(x) The quoted price shall be arranged in descending Order and allocation of available capacities shall be accorded in such descending Order until the available capacity is exhausted.

(xi) In case of equal price quoted by two or more consumers, the allocation from the residual available capacity at any stage under sub-clause (x) above shall be made in proportion to capacity being sought by such consumers.

(xii) All consumers, in favour of whom full capacities have been allotted, shall pay the highest price obtained from bids.

(xiii) The consumers, who are allotted less capacity, shall pay the price as quoted by them.

(xiv) SLDC shall reject bid which are incomplete, vague in any manner or not found in conformity with bidding procedure.

(xv) The successful bidder, in favour of whom the capacities have been allocated, shall pay transmission charges, wheeling charges, as the case may be, determined by bidding under sub-clause (xii) or (xiii) of this sub-Regulation.

(d) The reserved capacity by a short-term open access consumer is not transferable to others.

(e) The capacity available as a result of surrender or reduction or cancellation of the reserved capacity by the State Load Dispatch Centre, may be reserved for any other short-term open access consumer in accordance with these Regulations.

(f) On expiry of the period of the short-term open access, the short-term consumer shall not be entitled to any overriding preference for renewal of the term.

**(3) Within same distribution system.** - The procedure specified in clause (2) above, mutatis mutandis, shall apply to cases of short-term open access when the point of injection and the point of drawal are located in the same distribution system.

## **16. Consent by STU, SLDC or Distribution Licensee**

**(1) Inter-State open access.** - STU in the case of application for grant of long-term open access and SLDC in the case of grant of medium-term open access and short-term open access shall convey its consent or otherwise as per the provisions of Central Electricity Regulatory Commission's Regulations or Orders issued for this purpose and amended from time to time. In case of applicant connected to the distribution licensee, the said distribution licensee shall convey its consent or otherwise within 3 days of receipt of the request of the applicant.

### **(2) Intra-State Open Access.** -

(a) In respect of a consumer connected to a distribution system seeking Open access, such consumer shall be required to submit the consent of the distribution licensee

concerned. The distribution licensee shall convey its consent to the applicant by e-mail or fax or by any other usually recognized mode of communication, within three (3) working days of receipt of the application.

(b) While processing the application from a generating station seeking consent for open access, the distribution licensee shall verify the following, namely-

(i) Existence of infrastructure necessary for time-block-wise energy metering and accounting in accordance with the provisions of the State Grid Code in force, and

(ii) Availability of capacity in the distribution network and,

(iii) Availability of Remote Terminal Unit (RTU) and communication facility to transmit real-time data to the SLDC / Distribution Control Centre (DCC).

(c) Where existence of necessary infrastructure and availability of capacity in the distribution network has been established, the distribution licensee shall convey its consent to the applicant by e-mail or fax or by any other usually recognized mode of communication, within three (3) working days of receipt of the application.

(d) In case the distribution licensee finds that the application for consent is incomplete or defective in any respect, it shall communicate the deficiency or defect to the applicant by e-mail or fax or by any other usually recognized mode of communication, within two (2) working days of receipt of the application:

(e) In case the application has been found to be in Order but the distribution licensee refuses to give consent on the grounds of non-existence of necessary infrastructure or unavailability of surplus capacity in the distribution network, such refusal shall be communicated to the applicant by e-mail or fax or by any other usually recognized mode of communication, within the period of three (3) working days from the date of receipt of the application, along with reasons for such refusal:

(f) Where the distribution licensee has not communicated any deficiency or defect in the application within two (2) days from the date of receipt of application, or refusal or consent within the specified period of three (3) working days from the date of receipt of the application consent shall be deemed to have been granted.

**17. Consideration of applications from defaulters. -**

Notwithstanding anything contained in these Regulations, the Nodal Agency shall be at liberty to summarily reject an application for Open Access on the ground of non-compliance of the provisions of these Regulations, more specifically the provisions relating to timely payment of the charges leviable hereunder.

**Application Procedure and Approval for Open Access to eligible entities other than consumers and generating stations connected to distribution system**

**18. Application by eligible entities other than consumers and generating stations connected to distribution system. -**

The procedure for submission of the application and processing the same as laid down in this chapter in respect of the consumers shall, mutatis mutandis, be applicable to the electricity trading licensees, distribution licensees and the generating companies connected to the STU as well. The procedure for submission and processing of Open Access application by a generating company in respect of a generating station connected to distribution system has been specified in chapter 11 herein below.

**Common provisions for Open Access**

**19. Allotment Priority. -**

(1) The priority for allotment of open access in intra-State transmission system shall be decided on the following criteria:

(a) A distribution Licensee shall have the highest priority in allotment of open access capacity irrespective of whether the open access request is for long-term, medium-term or short-term.

(b) The long-term open access applicants shall have the priority next to the distribution licensee.

(c) The medium-term open access applicants shall have the priority next to the long-term open access applicants.

(d) The short-term open access applicants shall have the priority next to the medium-term open access applicants.

(e) Allotment priority for short-term open access applicants shall be decided subject to capacity availability.

(f) Subject to clauses (a) to (e) above, the decision shall be based on the basis of first come first served;

(g) An existing open access customer shall have the priority higher than new open access applicants under respective category provided the former applies for its renewal thirty days prior to the expiry of existing term of open access.

(h) When the requirement projected by an applicant is more than the available capacity and the said applicant is not able to limit his requirement to the available capacity, the request of applicant having next lower priority shall be taken up for consideration.

(i) During capacity availability constraints, the allotment can be made available to the next senior applicant, provided that the first senior is not able to limit his requirement to the available capacity and so on.

**CHAPTER 5**  
**OPEN ACCESS CHARGES**

**20. Transmission Charges. -**

Open Access customer using transmission system shall pay the charges as stated hereunder:

**(1) For use of inter-State transmission system. –** As specified by the Central Commission from time to time.

**(2) For use of intra-State transmission system. -**

**(a) By Long-Term and Medium-Term Open Access Customers. -**

Existing Long-Term Open Access and Medium-Term Open Access customers (including existing distribution licensees & generating companies) shall share the Annual Transmission Charges (ATC) of the State Transmission Utility/ transmission licensee, as determined by the Commission in the ARR for the relevant year, in the ratio of their allotted capacities. Transmission charges payable by other Long-Term Open Access and Medium-Term Open Access customers to the STU/ Transmission Licensee shall be determined as under:

Transmission Charges =  $ATC / (ACs \times 365)$  (in Rs./MW-day)

Where,

ATC= Annual Transmission Charges determined by the Commission for the transmission system of the STU / Transmission Licensee for the relevant year.

ACs = Sum of Capacities allocated to all Long-term and Medium-term Open Access customers in MW.

Provided further that where a dedicated transmission system used for open access has been constructed for exclusive use of an open access customer, the transmission charges for such dedicated system shall be worked out by transmission licensee for their respective systems and got approved by the Commission and shall be borne entirely by such open access customer till such time the surplus capacity is allotted and used for by other persons or purposes.

**(b) By Short-Term Open Access Customers. -**

Transmission Charges payable by a Short-Term Open Access customer shall be at a rate of one-fourth of the transmission charges applicable to the Long-Term / Medium-Term customer, as described above.

Provided that transmission charges for Short-Term open access shall be payable on the basis of capacity reserved for such customer.

(3) In case intra state transmission system or distribution system is used by an open access consumer in addition to inter-state transmission system, transmission charges and wheeling charges as fixed and approved by the Commission shall be payable for use of intra-state system in addition to payment of transmission charges for inter-state transmission.

**21. Scheduling and system operation charges. -**

Scheduling and system operation charges shall be payable by the Open Access customers at the following rates:

**(1) In respect of inter-State open access. -**

(a) Long-term open access and Medium-term open access

(i) Regional Load Despatch Centre fees and charges including charges for the Unified Load Despatch and Communication Scheme as specified by the Central Commission under section 28(4) of the Act.

(ii) State Load Despatch Centre charges as specified by the Commission under sub-section (3) of section 32 of the Act.

(b) Short-term open access

(i) Regional Load Despatch Centre and State Load Despatch Centre charges as specified by the Central Commission.

**(2) In respect of intra-State open access. -**

(a) Long-term, medium-term and short-term open access

(i) The scheduling and system operation charges payable to State Load Dispatch Center by open access consumer shall be such as determined by the Commission under section 32 of the Act;

(ii) The scheduling and system operation charges collected by the State Load Dispatch Center in accordance with clause (a)(i) above shall be in addition to the other fees and charges approved by the Commission under these Regulations;

(iii) The Scheduling and system operation charges shall be payable even when the open access consumer happens to be a generating company or trading Licensee, availing open access under these Regulations.

## **22. Wheeling Charges. -**

(a) Wheeling charges payable to Distribution Licensee, by an open access consumer shall be determined by the Commission. Wheeling charges shall be determined on the basis of same principles as laid down for intra state transmission charges.

Provided also that an open access customer connected to the STU system shall be liable to pay the wheeling charges determined under this Regulation, if such customer was paying wheeling charges directly or indirectly before availing open access.

(b) Where a dedicated distribution system used for open access has been constructed for exclusive use of an open access consumer, the wheeling charges for such dedicated system shall be worked out by the Licensee and got approved by the Commission and shall be borne entirely by such open access consumer till such time the surplus capacity is allotted and used for by other persons or purposes;

(c) In case intra state transmission system or distribution system is used by an open access consumer in addition to inter-state transmission system, transmission charges and wheeling charges as fixed and approved by the Commission shall be payable for use of intra-state system in addition to payment of transmission charges for inter-state transmission.

*Explanation: In case an Open Access customer continues to pay the fixed charge and such fixed charge can be attributed to wheeling/distribution network related cost, partly or fully, TNERC may provide for adjustment of such fixed charges against the wheeling charges determined as above.*

## **23. Cross subsidy surcharge. -**

(1) If open access facility is availed of by a subsidizing consumer of a distribution licensee of the State, then such consumer, in addition to transmission and/or wheeling charges, shall pay cross subsidy surcharge determined by the Commission. Cross

subsidy surcharge determined on Per Unit basis shall be payable, on monthly basis, by the open access consumers based on the actual energy drawn during the month through open access. The amount of surcharge shall be paid to the distribution licensee of the area of supply from whom the consumer was availing supply before seeking open access.

(2) The Cross Subsidy Surcharge shall be determined in the following manner.–

(i) The surcharge would be determined by the Commission as per the Commission's tariff Regulation;

(ii) The amount of surcharge shall be so calculated as to meet the current level of cross subsidy from that category of consumers and shall be paid to the Distribution Licensee of the area of supply from whom the consumer is availing supply;

(iii) The surcharge shall be progressively reduced in the manner as may be specified by the Commission.

Provided that the Commission may fix a lower surcharge in the situation of shortages and load shedding by the Distribution Licensee:

Provided further that in case the value of Surcharge calculated is negative, the same shall be zero:

Provided also that such cross subsidy surcharge shall not be levied in case distribution access is provided to a person who has established a captive generation plant for carrying the electricity to the destination of his own use:

Provided also that in case power supply position or the consumer's seeking open access changes substantially, the Commission may review the Cross Subsidy Surcharge.

## **24. Additional Surcharge. -**

(1) An open access consumer, receiving supply of electricity from a person other than the distribution licensee of his area of supply, shall pay to the distribution licensee an additional surcharge on the charges of wheeling, in addition to wheeling charges and cross-subsidy surcharge, to meet out the fixed cost of such distribution licensee arising out of his obligation to supply as provided under sub-section (4) of section 42 of the Act.

(2) This additional surcharge shall become applicable only if the obligation of the licensee in terms of power purchase commitments has been and continues to be stranded or there is an unavoidable obligation and incidence to bear fixed costs consequent to such a contract. However, the fixed costs related to network assets would be recovered through wheeling charges.

(3) The distribution licensee shall submit to the Commission on six monthly basis, a detailed calculation statement of fixed cost which the licensee is incurring towards his obligation to supply.

The Commission shall scrutinize the statement of calculation of fixed cost submitted by the distribution licensee and obtain objections, if any, and determine the amount of additional surcharge:

(4) Additional surcharge determined on per unit basis shall be payable, on monthly basis, by the open access customers based on the actual energy drawn during the month through open access:

## **25. Standby charges for drawal of power by open access customer from distribution licensee. -**

(a) In cases of outages of generator supplying to a consumer on open access or when the scheduled generation is not maintained or when the drawal by the said consumer is in

excess of the schedule, standby arrangements should be provided by the distribution licensee. Towards this end, the distribution licensee is entitled to collect charges for temporary connection to that category of consumer known as grid support charges for back up supply from the grid. As and when the Availability Based Tariff (ABT) regime is implemented in the State and the Unscheduled Interchange (UI) charges are fixed by the Commission, the grid support charges eligible to the distribution licensee shall be (a) the tariff applicable for the temporary connection to that category of consumer or (b) the applicable UI charges whichever is higher;

(b) If a generator happens to be an open access consumer, partly or fully in third party sale of power and he desires to avail start up power from the Grid, the generator shall be permitted to do so at a charge to be determined by the Commission for the start up power. However if the generator who has availed open access, happens to be a Captive Power Producer / NCES Generator / Independent Power Producer (IPP) and desires to avail start up power from the Grid, the transaction shall be governed by the respective CGP / NCES Regulations / Orders of the Commission or as per the power purchase agreement approved by the Commission in the case of an IPP.

## **26. Parallel Operation Charges. -**

If the Captive Generating Plants (CGPs) opt for parallel operation with the licensee's grid for safe and secure operation of their generators and to provide quality reliable power supply to their load, the CGPs shall pay the parallel operation charges as fixed by the Commission from time to time.

## **27. Restoration Charges. –**

Any default in payment of the various charges as specified above, within the time stipulated by the Commission will result in the discontinuance of the open access to the consumer. Restoration of such discontinuance shall be subject to the payment of restoration charges and other restoration conditions to be determined by the Commission separately and from time to time

**CHAPTER 6**  
**SCHEDULING, METERING, REVISION AND LOSSES**

**28. Scheduling. -**

(1) Notwithstanding anything contained in the succeeding clauses of this Regulation, scheduling of inter-State open access transactions shall be as specified by the Central Commission.

(2) Intra-State open access transactions in respect of consumers and all generating stations irrespective of the capacity shall be scheduled by SLDC in accordance with the provisions of the State Grid Code.

**29. Metering. -**

(1) Special Energy Meters shall be installed for all open access consumer and generating stations irrespective of capacity, by the State Transmission Utility or the distribution licensee as the case may be, for and at the cost of the customer.

(2) Special Energy Meters installed shall be capable of time-differentiated measurements for time-block-wise active energy and voltage differentiated measurement of reactive energy in accordance with the State Grid Code.

(3) Special Energy Meters shall always be maintained in good condition.

(4) Special Energy Meters shall be open for inspection by any person authorized by the State Transmission Utility or the State Load Despatch Centre.

(5) All the open access customers shall abide by the Central Electricity Authority (Installation and operation of meters) Regulations, 2006.

### **30. Revision. -**

Revision of scheduled energy shall be permitted in accordance with the provisions of IEGC or the State Grid Code as the case may be.

### **31. Losses. -**

#### **(1) Transmission losses. -**

##### **(a) Inter-State transmission. -**

(i) Long-term open access and medium-term open access: The buyers shall bear apportioned energy losses in the transmission system in accordance with the provisions specified by the Central Commission.

(ii) Short-term Open Access: The buyers and sellers shall bear apportioned energy losses in the transmission system in accordance with the provisions specified by the Central Commission.

##### **(b) Intra-State transmission. -**

The open access customers shall bear the transmission losses as determined by the Commission in its Orders issued from time to time and shall be payable in kind at relevant voltage level.

#### **(2) Distribution loss. -**

The open access customers shall bear the system losses for the distribution system as determined by the Commission in its Orders issued from time to time and shall be payable in kind at relevant voltage level.

## CHAPTER 7

### IMBALANCE AND REACTIVE ENERGY CHARGES

#### 32. Imbalance Charge. -

(1) Scheduling of all transactions pursuant to grant of long-term open access or medium term open access or short-term open access shall be carried out on day-ahead basis in accordance with the relevant provisions of IEGC for Inter-State transactions and in accordance with State Grid Code for Intra-State transactions.

(2) In case of deviation by open access consumers, the difference between the applicable sanctioned Open Access load and the actual drawal shall be accounted through the Time of Day (ToD) Meters on monthly basis and settled at the rate of the imbalance charge as determined by the Commission. In case of underdrawal as a result of non availability of the distribution system or unscheduled load shedding, the open access consumer shall be compensated by the distribution licensee at the average power purchase cost of the distribution licensee.

#### [Explanation.-

1. **'Average Power Purchase Cost'** means the weighted average pooled price at which the distribution licensee has purchased the electricity including cost of self generation in the previous year.

2. For the purpose of this Regulation, unscheduled load shedding means, load shedding during hours other than the hours for which load shedding has been announced by the distribution licensee.]

(3) Deviations between the schedule and the actual injection/drawal in respect of open access consumers and the Generating Stations irrespective of the capacity, shall be settled based on the composite accounts for imbalance transactions issued by SLDC on a

weekly cycle based on net metering in accordance with the charges specified by the Commission.

(4) Payment of imbalance charges shall have a high priority and the concerned constituents (including the licensees or the open access customers as the case may be) shall pay the indicated amounts within 10 (ten) days of the issue of the statement, into a State Imbalance Pool Account operated by the SLDC. The person who has to receive the money on account of imbalance charges would then be paid out from the State Imbalance Pool Account, within three (3) working days.

(5) If payments against the above imbalance charges are delayed by more than two days, i.e., beyond twelve (12) days from the date of issue of statement, the defaulting party shall have to pay simple interest @ 0.04% for each day of delay. The interest so collected shall be paid to the person who had to receive the amount, payment of which got delayed. Persistent payment defaults, if any, shall be reported by the SLDC to the Commission, for initiating remedial action.

### **33. Reactive Energy Charge. -**

The payment for the reactive energy charges by open access consumers shall be in accordance with provisions stipulated in the State Grid Code.

## **CHAPTER 8**

### **COMMERCIAL MATTERS**

### **34. Billing, collection and disbursement. –**

Billing in respect of the charges payable under these Regulations shall be made as per the following procedure:

**(1) Inter-State transactions. –**

**(a) Short-term Open Access. –**

(i) Collection and disbursement of transmission charges for use of CTU and STU systems and operating charges payable to RLDCs and SLDCs towards short-term open access shall be made by the nodal RLDC in accordance with the procedure specified by the Central Commission.

(ii) The short-term open access customer connected to distribution system of a distribution licensee shall pay to such distribution licensee the charges payable to the distribution licensee within 3 days from the grant of the short-term open access by the nodal agency.

**(b) Long-term open access and medium- term open access. –**

(i) Billing, collection and disbursement of charges payable to RLDC including Unified Load Despatch and Communication Scheme shall be in accordance with the procedure specified by the Central Commission.

(ii) Bills towards the charges payable to SLDC shall be raised by the STU/SLDC directly to the open access customer connected to STU and to the distribution licensee in respect of the customers connected to the distribution system, before the 3<sup>rd</sup> working day of the succeeding calendar month.

(iii) Distribution licensee shall raise the bill with the open access customer connected to it within 3 days of receipt of bill from SLDC.

(iv) Open access customer connected to the distribution licensee shall pay the charges within five days of receipt of bill from distribution licensee. The distribution licensee shall disburse the amount payable to STU/SLDC on a monthly basis.

(v) Open access customer connected to the STU shall pay the bills within five working days of receipt of the bill.

**(2) Intra-State transactions. –**

**(a) Short-term Open Access. –**

(i) The short-term open access customer shall deposit with SLDC the transmission charges and operating charges within three working days of grant of the short-term open access by SLDC.

(ii) In addition to the above, the short-term open access customer connected to distribution system of a distribution licensee shall also pay to SLDC, the charges payable to the distribution licensee within three days from the grant of the short-term open access by the nodal agency. Such charges would be disbursed to the distribution licensee on a weekly basis.

**(b) Long-term and Medium-Term open access. -**

SLDC, transmission licensees and distribution licensee, where applicable, shall communicate to STU the details of the bills due to them by the 3rd day of the succeeding calendar month. STU shall separately indicate the above charges and raise the bill with the open access customer, together with the charges receivable by it, if any, before the 5<sup>th</sup> day of the above month. The open access customer shall pay the charges within seven days from the date of receipt of the bill. STU shall disburse the

charges payable to SLDC, transmission licensee and distribution licensee on a monthly basis.

**35. Late payment surcharge. -**

In case the payment of any bill for charges payable under these Regulations is delayed by a open access customer beyond the due date, without prejudice to any action under the Act or any other Regulation thereunder, a late payment surcharge at the rate of 1.5% per month shall be levied.

**36. Default in payment. -**

(1) Non-payment of any charge or sum of money payable by the open access customer under these Regulations (including imbalance charges) shall be considered non-compliance of these Regulations and shall be liable for action under section 142 of the Act in addition to action under section 56 of the Act. The STU or any other transmission licensee or a distribution licensee may discontinue open access after giving customer an advance notice of fifteen days without prejudice to its right to recover such charges by suit.

(2) In case of default in payment of charges due to the State Load Despatch Centre, the State Load Despatch Centre may refuse to schedule power to the defaulting open access customer and direct the licensee concerned to disconnect such customer from the grid.

**37. Payment Security Mechanism. -**

In case of long-term open access and medium-term open access, the applicant for open access will open an irrevocable Letter of Credit in favour of the agency responsible for collection of various charges for the estimated amount of various charges for a period of two months.

## CHAPTER 9 INFORMATION SYSTEM

### **38. Information system. -**

The State Load Dispatch Centre shall post the following information on its website in a separate web page titled "Open access information" and also issue monthly and annual report containing such information.

(1) A status report on long-term open access or medium-term open access customers indicating:

- (a) Name of customer;
- (b) Period of open access granted (date of commencement and date of termination);
- (c) Point of injection;
- (d) Point of drawal;
- (e) Transmission system / distribution system used, and
- (f) Open access capacity used.

(2) A status report on the current short-term open access customers indicating:

- (a) Name of customer;
- (b) Period of open access granted (date of commencement and date of termination);
- (c) Point of injection;
- (d) Point of drawal;
- (e) Transmission system / distribution system used, and;
- (f) Open access capacity used.

(3) A status report on the Limited short-term open access customers indicating:

- (a) Name of customer;

- (b) Period of open access granted (date of commencement and date of termination);
- (c) Schedule of open access period for each day.
- (d) Point of injection;
- (e) Point of drawal;
- (f) Transmission system / distribution system used, and
- (g) Open access capacity used.

(4) Peak load flows and capacity available including the reserve capacity on all EHV lines and HV lines emanating from EHV sub- stations.

(5) The information regarding average loss in transmission and distribution system as determined by respective licensees.

## **CHAPTER 10**

### **OPEN ACCESS TO GENERATING STATION CONNECTED TO DISTRIBUTION SYSTEM**

39. A generating station connected to a distribution system seeking open access shall have to follow, except in respect of the case covered under Regulation 47, the same procedure as applicable for a consumer seeking open access under different scenarios, namely long-term open access, medium-term open access and short-term open access. Such generating station shall also be liable to pay the same application fee, and other open access charges except the cross subsidy surcharge and additional surcharge as are applicable to a consumer seeking open access.

40. A generating station seeking open access only within the area of the same Distribution Licensee, shall make an application in the prescribed format to the Distribution Licensee.

41. The distribution licensee, while processing the application of such a generating station, shall follow the following procedure:

(1) While processing the application from a generating station seeking open access, the distribution licensee shall verify the following, namely-

(a) Existence of infrastructure necessary for time-block-wise energy metering and accounting in accordance with the provisions of the State Grid Code in force, and

(b) Availability of capacity in the distribution network.

(2) Where existence of necessary infrastructure and availability of capacity in the distribution network has been established, the distribution licensee shall convey its approval within the timelines indicated in Tables 1 and 2 as applicable to a consumer.

(3) In case the distribution licensee finds that the application is incomplete or defective in any respect, it shall communicate the deficiency or defect to the applicant by e-mail or fax or by any other usually recognized mode of communication, within two (2) working days of receipt of the application:

(4) In case the application has been found to be in Order but the distribution licensee refuses to give approval for open access on the grounds of non-existence of necessary infrastructure or unavailability of surplus capacity in the distribution network, such refusal shall be communicated to the applicant by e-mail or fax or by any other usually recognized mode of communication, within the period of three (3) working days from the date of receipt of the application, along with reasons for such refusal

(5) The Generating station shall pay the wheeling charge to the distribution licensee as determined by the Commission. The treatment of deemed generation in case of non availability of distribution system shall be settled mutually between the generating station and the distribution licensee.

## CHAPTER 11

### MISCELLANEOUS

#### **42. Under utilization or non utilization of open access capacity in intra-State transmission system. -**

**(1) Long-term open access.** - A long-term open access customer may relinquish the long-term open access rights fully or partly before the expiry of the full term of long-term open access, by making payment of compensation for stranded capacity as follows:-

#### **(a) Long-term open access customer who has availed access rights for at least 12 years. -**

(i) Notice of one (1) year – If such a customer submits an application to the State Transmission Utility at least 1 (one) year prior to the date from which such customer desires to relinquish the access rights, there shall be no charges.

(ii) Notice of less than one (1) year – If such a customer submits an application to the State Transmission Utility at any time lesser than a period of 1 (one) year prior to the date from which such customer desires to relinquish the access rights, such customer shall pay an amount equal to 66% of the transmission charges for the stranded transmission capacity for the period falling short of a notice period of one (1) year.

**(b) Long-term open access customer who has not availed access rights for at least 12 (twelve) years.** - such customer shall pay an amount equal to 66% of the estimated transmission charges (net present value) for the stranded transmission capacity for the period falling short of 12 (twelve) years of access rights:

Provided that such a customer shall submit an application to the State Transmission Utility at least 1 (one) year prior to the date from which such customer desires to relinquish the access rights:

Provided further that in case a customer submits an application for relinquishment of long-term open access rights at any time at a notice period of less than one year, then such customer shall pay an amount equal to 66% of the estimated transmission charges (net present value) for the period falling short of a notice period of one (1) year, in addition to 66% of the estimated transmission charges (net present value) for the stranded transmission capacity for the period falling short of 12 (twelve) years of access rights.

(c) The discount rate that shall be applicable for computing the net present value as referred to in sub-clause (a) and (b) of clause (1) above shall be the discount rate to be used for bid evaluation in the Central Commission's Notification issued from time to time in accordance with the Guidelines for Determination of Tariff by Bidding Process for Procurement of Power by distribution Licensees issued by the Ministry of Power from time to time.

(d) The compensation paid by the long-term open access customer for the stranded transmission capacity shall be used for reducing transmission charges payable by other long-term open access customers and medium-term open access customers in the year in which such compensation payment is due in the ratio of transmission charges payable for that year by such long-term and medium-term open access customers.

**(2) Medium-term Open Access customers.** - A medium-term open access customer may relinquish rights, fully or partly, by giving at least 30 days prior notice to the nodal agency:

Provided that the medium-term open access customer relinquishing its rights shall pay applicable transmission charges for the period of relinquishment or 30 days whichever is lesser.

**(3) Short-term open access customer. –**

(a) The short-term open access schedules accepted by the nodal agency in advance or on first-come-first-served basis may be cancelled or revised downwards on an application to that effect made to the nodal agency by the short-term open access customer:

Provided that such cancellation or downward revision of the short-term open access schedules shall not be effective before expiry of a minimum period of two (2) days:

Provided further that the day on which notice for cancellation or downward revision of schedule is served on the nodal agency and the day from which such cancellation or downward revision is to be implemented, shall be excluded for computing the period of two (2) days.

(b) The person seeking cancellation or downward revision of short-term open access schedule shall pay the transmission charges for the first two (2) days of the period for which the cancellation or downward revision of schedule, as the case may be, has been sought, in accordance with the schedule originally approved by the nodal agency, and thereafter in accordance with the revised schedule prepared by the nodal agency during the period of such cancellation or downward revision.

(c) In case of cancellation, operating charges specified in Regulations 21 of these Regulations shall be payable for two (2) days or the period of cancellation in days, whichever is less.

**43. Computation of capacity availability for open access. –**

(1) The capacity available for the open access shall be computed for each transmission segment and for every sub-station by the STU following the methodology given below:

(a) Available open access capacity of a transmission system segment: = (DC-SD-AC) + NC - ND

Where,

DC=Designed capacity of the transmission segment in MW,

SD = Sustained demand (peak load experienced) in MW recorded in the segment,

AC = Already allotted capacity, but not availed in MW,

NC = New capacity in MW expected to be added and

ND = New Demand expected to be added.

(b) Available open access capacity of a sub-station: =  $(TC-SP- AC)+NC - ND$

Where,

TC= Transformer capacity of the sub- station in MVA,

SP= Sub-station peak in MVA,

AC= Already allotted capacity but not availed in MVA,

NC = New transformer capacity in MVA expected to be added and

ND = New Demand in MVA expected to be added.

(c) The STU shall update these values on monthly basis on the first calendar day of the month and publish it in their website.

(2) The appropriate distribution licensee shall determine the available capacity for allotment for the portion of the distribution system over which open access has been requested for.

#### **44. Curtailment Priority. –**

When, because of constraints or otherwise, it becomes necessary to curtail the open access service of the customers, subject to the requirements of State Grid Code, the open access to a distribution licensee shall be the last to be curtailed. Among others, short-term open access customers shall be curtailed first, followed by the medium-

term open access customers followed by long- term open access customers. SLDC shall frame guidelines for curtailment of open access customers.

**45. Detailed Procedure. -**

(1) Subject to the provisions of these regulations, the State Transmission Utility and the Distribution Licensee shall submit the detailed procedure to the Commission for approval within 60 days of notification of these regulations in the Official Gazette:

Provided that prior to submitting the detailed procedure to the Commission for approval, the State Transmission Utility and the Distribution Licensee shall make the same available to the public and invite comments by putting the draft detailed procedure on their website and giving a period of one month to submit comments;

Provided further that while submitting the detailed procedure to the Commission, the State Transmission Utility and the Distribution Licensee shall submit a statement indicating as to which of the comments of stakeholders have not been accepted by it along with reasons thereof.

(2) The detailed procedure submitted by the State Transmission Utility and Distribution Licensee shall, in particular, include -

(a) The proforma for application of connectivity and the connection agreement.

(b) The proforma for application of long-term, medium-term and short term open access and LTOA/MTOA agreements.

(c) Any other points, including payment mechanisms for application fee, bank guarantees etc., necessary for implementation of these regulations.

#### **46. Powers to Remove Difficulties. -**

If any difficulty arises in giving effect to any of the provisions of these Regulations, the Commission may by general or special Order, direct the State Transmission Utility, State Load Dispatch Centre, intra-State licensees and the open access customer, to take such action, as may appear to the Commission to be necessary or expedient for the purpose of removing difficulties.

#### **47. Force Majeure. –**

(1) Any event which is beyond the control of the parties to the open access agreement which they could not foresee or with a reasonable amount of diligence could not have foreseen or which could not be prevented and which substantially affect the performance by either party such as, but not limited to the following shall be classified as force majeure events for the purpose of these Regulations. -

- (i) natural disasters (earthquakes, hurricane, floods);
- (ii) wars, riots or Civil Commotions and other upheavals; and
- (iii) grid / distribution system's failure not attributable to parties hereto

(2) Both the parties of the open access agreement shall ensure compliance of the terms and conditions of the agreement. However, no party shall be liable for any claim for any loss or damage whatsoever arising out of failure to carry out the terms of the open access agreement to the extent that such failure is due to force majeure. But, any party claiming the benefit of the force majeure shall satisfy the other party of the existence of such an event(s)

#### **48. Power to amend. –**

The Commission may, at anytime, vary, alter, modify or amend any of the provisions of these Regulations.

#### **49. Repeal and Savings**

(1) Save as otherwise provided in these Regulations, "Tamil Nadu Electricity Regulatory Commission - Intra State Open Access Regulations, 2005" shall stand repealed from the date of commencement of these Regulations.

(2) Notwithstanding such repeal, anything done or purported to have been done under the repealed Regulations so far as it is not inconsistent with these Regulations shall be deemed to have been done or purported to have been done under these Regulations.

(3) Open access customers to the intra-State transmission system and the distribution system in the State on the date of coming into force of these Regulations under an existing agreement / contract shall be entitled to continue to avail such access to the transmission and distribution system on the same terms and conditions, as stipulated under such existing agreement/contract. Such persons are eligible to avail long-term open access or medium-term open access under these Regulations on expiry of such existing agreement/contract. Such of those persons, shall have to apply to come under the long-term open access or medium-term open access category at least thirty days prior to the expiry of such existing agreement/contract.

(4) These Regulations are in addition to the other Regulations / Codes issued by the Commission and not in derogation of the same.

**(By order of the Tamil Nadu Electricity Regulatory Commission)**

**APPLICATION FOR GRANT OF SHORT-TERM OPEN ACCESS**

(to be submitted by the customer to SLDC)

To: The Superintending Engineer / SLDC,

1	Customer Application No.	< self generated by customer >	Date	
2	Period of Transaction	< 3 months and more / less than 3 months / day-ahead >		
3	Nature of Customer*	< seller/buyer/captive user/trader(on behalf of seller/buyer/captive user) >		

<\* In terms of power transfer>

4	Customer Name			
5	Registration Code		Valid up to	

< Registration code shall be as provided by SLDC >

6	Details of Transaction Party's to Grid		
		Injecting Entity	Drawee Entity
	Name of Entity		
	Status of Entity*		
	Utility in which it is Embedded		

< \* In terms of ownership- State Utility/CPP/IPP/ISGS/Discom/Consumer/specify, if any other >

7	Details of Injecting/Drawee Connectivity with intra-State System		
		Injecting Entity	Drawee Entity
	Name of Sub-station	Transmission	
		Distribution	
	Voltage Level	Transmission	
		Distribution	
	Name of Licensee (Owner of S/S)		
	Intervening intra-State Licensee		
	Intervening inter-State Licensee		

< Distribution license, if required, may treat interface periphery as its connectivity points >

8	Open Access Sought for ( Period from date ____ to date ____ )				
	Date		Hours		Capacity
	From	To	From	To	MW*

< MW\* at point of injection >

9	Details of PPA/PSA/MoU					
	Name & Address of Parties		Date of	Validity Period		Capacity
	Seller	Buyer	PPA/PSA/MoU	Commencement	Expiry	MW*

< MW\* at point of injection >

10	<b>Details of Non-Refundable Application Fee Made</b>				
	Bank Details	Instrument Details			Amount(Rs.)
		Type(Draft/Cash)	Instrument No.	Date	

11	I hereby authorize SLDC to process said application, in case open access capacity allotted, for day-ahead scheduling in accordance with the provisions of intra-State ABT.
----	--

12	<b>Declaration</b>
	All Entities/Utilities to transaction shall abide by provisions of the Electricity Act 2003(the Act), TNERC(Intra-State Open Access) Regulations, 2011 and any other relevant Regulation/Order/ code as amended from time to time.

Name & Designation

**Enclosures**

- (1) Non-refundable application fee by Demand draft or cash receipt (if payment by cash).
- (2) Self-certified copy of PPA/PSA/MoU entered between the parties (buyer and seller) of transaction stating contracted power, period of transaction, drawal pattern, point(s) of injection and drawal etc.
- (3) Self-certified copies of concurrence of STU and/or transmission licensee and/or distribution licensee. (If period of transaction is of three months and more)
- (4) If any other

**Copy to along with relevant enclosures [except (1) & (2)]:**

- (1) Managing Director of transmission licensee involved in transaction.
- (2) Director / Distribution of distribution licensee involved in transaction.
- (3) Officer in charge of transmission substation involved in transaction.
- (4) Officer in charge of distribution substation involved in transaction.
- (5) Any other concerned.
